DETAILED ACTION

Response to Amendment

Claim Rejections - 35 USC § 112

The 35 USC 112 rejections have been withdrawn in light of the applicant's arguments presented on 3/30/2009.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 14, 17, and 26-29 are rejected under 35 U.S.C. 102(b) as being anticipated by DCA Design International (WO 02/076535). DCA discloses a drug delivery injection device comprising a housing (2) wherein a first portion of the housing is configured to receive a cartridge (6) and the second part of the housing contains a drive mechanism including an epicyclic gearbox (20, 22, 24, 26), further comprising a drive sleeve (31) capable of engaging a piston, and further comprising a dose dial means (42). The examiner notes that the term "epicyclic gearbox" is being interpreted with the definition provided by the specification.

Allowable Subject Matter

Claims 14, 17, and 26-29 are allowed.

Response to Arguments

Applicant's arguments filed 3/30/2009 have been fully considered but they are not persuasive.

In response to the applicant's argument that WO '535 does not disclose a drive sleeve, the examiner notes that the rejection has been changed and therefore the applicant's arguments are moot. Element (31) is a tubular structure and therefore can be considered a drive sleeve.

In response to the applicant's argument that WO '535 does not disclose a dose dial sleeve that is configured to drivingly engage the epicyclic gearbox, the examiner respectfully disagrees. The examiner maintains that element (42) can engage the gearbox through other structures. The claims do not require that the dose dial sleeve is in direct contact with the gearbox.
